Call for Papers

Dear EURAM members and friends,

Join us in Paris on the 1, 2, 3 and 4 June for the 2016 EURAM Conference!

We, management scholars, may have put too much emphasis on research about competition and top down processes and not enough emphasis on cooperation.

Our theme “Manageable Cooperation?” invites to debate about the new modes of production together with the new ways of value creation and distribution that are emerging and growing, as well as on how old systems are transformed with new demands for cooperation at the political and productive macro, meso and micro levels.

Let’s meet at Université Paris–Est Créteil (UPEC) ideally located 20 minutes away from Paris’ Center (metro station Créteil Université). UPEC is partnering with prestigious French Business Schools to organise a 2016 EURAM conference providing a memorable opportunity for scholars and practitioners, as well as for doctoral students, to share and discuss their most recent high quality work with other experts in their research fields. The more detailed programme of our stimulating, interactive keynote speeches and roundtables, workshops, symposia, development working groups, and much more, will soon be posted on our website.

To submit your full paper to EURAM 2016:

I. Explore the tracks sponsored by one of the 13 EURAM Strategic Interest Groups (SIGs) or by the 2016 Conference Committee and choose the topic and community that correspond best to your research.

II. Please respect the deadlines, especially the paper submission deadline: 12 January 2016 - 2 pm Belgian time

III. Please, comply with the paper submission guidelines.

For new comers: Our 13 SIGs are the building blocks of EURAM. Their Chairs and Officers nurture communities of engaged scholars focused on specific research issues. Standing tracks are tracks having the vocation to stand at least during a few years within a SIG. If tracks are listed as “2016 Tracks”, they were selected after a competitive submission and review process (they may become standing tracks from 2017 if they meet a great success). Each SIG General Track invites contributions from all areas related to its specific research issues that are not explicitly covered by other tracks within the SIG.
